

## Role of Local Breeds in Global Agriculture—Local Food, Regional Identity and Ecosystem Services

Guest Editors:

**Prof. Dr. Ante Ivanković**

Department of Animal Science and Technology, Faculty of Agriculture University of Zagreb, 10000 Zagreb, Croatia

**Dr. András Gáspárdy**

Department for Animal Breeding and Genetics, University of Veterinary Medicine, 1078 Budapest, Hungary

Deadline for manuscript submissions:

**25 August 2024**

### Message from the Guest Editors

The genetic, economic, and social (cultural) value of local breeds is undisputed, but they must also adapt to the challenges of global agriculture, especially with regard to the sustainability and safety of animal products. Therefore, in the case of products of local breeds, we can speak of *terroir*, a recognizable quality resulting from the specific interaction of local breed–plant–soil. Local breeds are part of the regional identity and culture of life, visible in almost all local manifestations. In the last half century, there has been a growing appreciation of the importance of local breeds and their adaptability to natural environmental conditions that ensure local, regional, and global food production. Local breeds are considered a potential "source" of food raw material derived from crossbreeding and of genes for an efficient introgression into cosmopolitan breeds in which some desirable features have been lost.

Therefore, the editors aim to stimulate scientific reflection and present best practices on the "Role of Local Breeds in Global Agriculture—Local Food, Regional Identity and Ecosystem Services

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
