Pharmaceutical and Agricultural
Sciences (DOCPAS), University of
Ferrara, 44121 Ferrara, Italy

Message from the Guest Editors

With human health being linked to soil health, the most evident thing that soils do for people is provide a basis for food production. However, other critical ecosystem services are provided by healthy soils to human health, including carbon sequestration, detoxification, water and nutrient retention, and maintaining biodiversity. As the Guest Editor of the Special Issue below, I would like to invite you to contribute with a paper regarding experimental studies on soil quality/health assessment in agricultural systems to evaluate ecological services beyond food production, promoting knowledge on sustainable agricultural management for natural resource maintenance and future progress of agroecosystems.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
