### Message from the Guest Editor

Hygiene is of extreme importance, especially during a pandemic, be it among humans or animals. Even though the direct effects are often difficult to measure, prevention pays off in terms of prevented outbreaks of disease and the associated benefits. In this Special Issue, new research on animal hygiene should be presented. Papers dealing with all livestock production systems, including aquaculture, can be submitted. Classic (i.e., disinfection, air hygiene) and new approaches (i.e., precision livestock farming and other innovative concepts) are welcome. Economic considerations and potential conflicting goals should also be taken into account. Moreover, studies evaluating potential gaps in animal hygiene and ways to overcome identified shortcomings are of interest, as well as comprehensive review articles.

This Special Issue aims at showing the broad range and utmost importance of animal hygiene in livestock farming. Therefore, I invite you to contribute by submitting your papers, with the aim of summarizing the successes, limitations, and ongoing challenges to realize animal hygiene in farms.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
