Message from the Guest Editor

This Special Issue of *Agriculture* aims to collect case study analyses of the causes and consequences of structural changes on family farms in developed, developing and transition economies. International comparisons are also welcome. Papers focusing on specific institutional arrangements and policy reforms are particularly encouraged. Key topics in this Special Issue include, but are not limited to, the following:

- Interlinkages between different aspects of structural change;
- Do observed structural changes result primarily from adaptations on continuing farms or from selective entry and exit?
- Role of policy reforms in the structural change process;
- Food security implications of structural changes;
- Family farm structural change and the resilience of rural areas;
- Farm structural changes and sustainability;
- Gender roles and farm structural change.

an Open Access Journal by MDPI
