Message from the Guest Editor

Dear Colleagues,

I would like to invite you to contribute to this Special Issue, “Weed Management”. Weed scientists and farmers are currently facing severe challenges with new invasive weeds and herbicide resistant weed biotypes. Global warming results in a shift of weed species communities. Conservation tillage causes problems with perennial weed species in arable fields. Very little progress is expected for chemical weed control. Sensor-based mechanical and chemical weed control systems are still under development. Therefore, it is very important to combine preventive and direct methods of weed control into integrated weed management systems. We want to present the latest research on integrated weed management in this Special Issue. This issue will cover all disciplines of weed research in agricultural fields belonging to the keywords listed below.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
