Message from the Guest Editors

Dear Colleagues,

Improving herd economics, progress in animal production and rational herd management is possible, taking into account the welfare and health status of the animals. The interest in improving the efficiency of animal production is determined by biological and technological progress. Research studies concerning farm animals' welfare, behavior and health embrace different scientific areas. For this Special Issue, original and review manuscripts covering all aspects of the link between physiological and pathological processes and farm animals, such as ruminants, pig, poultry and horses, are welcome. Additional topics may include the new treatment protocols and/or biomarkers to improve welfare and/or disease recognition. Experts in the field of physiology and pathology of animals, animal feeding, nutrigenomics, neonatology, animal welfare and wellbeing and human and animal health protection are invited to submit manuscripts for peer review. Once the manuscript suits the scope of the Special Issue and meets the editorial criteria, it will be initially evaluated by the Guest Editors.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
