Deadline for manuscript submissions:

30 September 2024

Message from the Guest Editors

Dear Colleagues,

The recognised dangers of environmental change and the genetic erosion of plant genetic resources have inspired numerous efforts toward conserving plant genetic resources worldwide.

Agroecosystems' productivity is determined by seeds, which are crucial to the existence and spread of plants. Plant diversity creates a natural resilience to challenges such as new strains of disease or climate change. Conservation of germplasm, therefore, supports global efforts to ensure future food security through natural and existing plant diversity and the development of new crops for agriculture. Important plant genetic resources include seeds of landraces, wild relatives, wild species and modern cultivars. In addition, biotechnological advances are helping to accurately characterise and conserve rare and endangered species.

This Special Issue aims to examine the role of seed conservation and utilisation in terms of quality, seedling establishment, nutrient uptake, drought resistance and resistance to pests and diseases, exploring local germplasm and underutilised crop species.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
