Social-Ecologically More Sustainable Agricultural Production

Guest Editors:

Dr. Moritz von Cossel

Biobased Resources in the Bioeconomy (340b), Institute of Crop Science, University of Hohenheim, 70599 Stuttgart, Germany

Dr. Joaquín Castro-Montoya

Graduate School, Faculty of Agricultural Sciences, University of El Salvador, San Salvador, El Salvador

Dr. Yasir Igbal

College of Bioscience and Biotechnology, Hunan Agricultural University, Changsha, Hunan 410128, China

Deadline for manuscript submissions:

closed (30 September 2023)

Message from the Guest Editors

This Special Issue aims to provide a platform for presenting and discussing new findings or approaches on relevant topics of social-ecologically more sustainable agricultural production. Making significant progress in developing and implementing more sustainable agricultural production is one of the most important challenges that humanity faces in climate change era farming and involves considering both economic and social-ecological aspects in the long term. Social-ecologically more sustainable agricultural production is intended to (i) meet the increasing demand for food, (ii) reduce environmental degradation, and (iii) improve many other ecosystem services, such as the provision of medicinal resources, climate regulation, air disturbance modulation, nutrient quality, pollination, nursery service, and aesthetic information.

We look forward to receiving your contributions on the broad topic of this Special Issue on "Social–Ecologically More Sustainable Agricultural Production".

Editor-in-Chief

Prof. Dr. Peter Langridge

School of Agriculture, Food and Wine, University of Adelaide, Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
