- Legnaro (Padova), Italy

Dr. Alessandro Vannozzi

Department of Agronomy Food
Natural Resources Animals
Environment, Campus of
Agripolis, University of Padova,
35020 Legnaro, Italy

Deadline for manuscript
submissions:

closed (30 June 2020)

Message from the Guest Editors

The challenges in viticulture that are promoting the initiation of breeding programs are also coming together with new technologies and knowledge derived from the improvement of our comprehension of the genetic and epigenetic control of important agronomical and quality traits in grapevines. This knowledge is now rapidly growing thanks to holistic approaches based on omics and ecophysiological remote sensing. Please share your success stories from research in the innovation of viticulture techniques and grapevine breeding around the world in this special issue. Submissions are invited on (but not limited to) the following topics: (1) conventional breeding to obtain new varieties and rootstocks and viticultural practices for the colonization of new areas; (2) new genetic approaches (e.g., genome editing) to enhance resistance to biotic and abiotic stresses; (3) studies of vegetation phenology and stresses using next generation sensors; (4) cultivation techniques to manage grapevine berry development and ripening processes in changing climate conditions; and (5) impact of pest management on the biodiversity of vineyards.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Peter Langridge

School of Agriculture, Food and
Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
