

Research Progress and Application Prospect of Medicinal Plants

Guest Editors:

Dr. Marcus Tullius Scotti

Department of Chemistry,
Federal University of Paraíba,
João Pessoa, PB, Brazil

Prof. Dr. Luciana Scotti

Campus I, Federal University of
Paraíba, João Pessoa 58051-970,
PB, Brazil

Dr. Eugene Muratov

UNC Eshelman School of
Pharmacy, University of North
Carolina, Chapel Hill, NC, USA

Deadline for manuscript
submissions:

closed (31 August 2023)

Message from the Guest Editors

Natural organisms, especially plants, provide innumerable molecules, phenolic compounds, flavonoids, alkaloids, terpenes, secondary metabolites of plants, with the potential to treat several diseases because of their beneficial effects on human health, such as antiviral, antiallergic, antiplatelet, anti-inflammatory, antitumor, antioxidant and antiparasitic activities.

The use of natural products has been the subject of increasing interest in phytochemistry, biochemistry and other fields of research in the chemistry–biology–ecosystem interface. Many studies report different approaches to using these compounds in drug discovery, which comprise synthesis, semi-synthesis, searches for new targets, evaluation of biological activities, and/or theoretical approaches as structure-based approaches, SAR, QSAR, docking and cheminformatics methods.

The objective for this thematic issue is to report on recent research using medicinal plants for the treatment or cure of diseases.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Peter Langridge

School of Agriculture, Food and
Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
