

State-of-the-Art Anatomical Research in the Mediterranean Region 2022

Guest Editors:

**Prof. Dr. Rafael Coveñas
Rodríguez**

Laboratory of Neuroanatomy of the Peptidergic Systems, Institute of Neuroscience of Castilla and León (INCYL), University of Salamanca, c/ Pintor Fernando Gallego 1, 37007 Salamanca, Spain

Dr. Pilar Marcos

Cellular Neuroanatomy and Molecular Chemistry of Central Nervous System Group, Regional Center for Biomedical Research (CRIB), University of Castilla-La Mancha, 02008 Albacete, Spain

Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editors

Dear Colleagues,

MDPI has launched a new open access journal named *Anatomia*, focusing on all aspects of anatomical sciences from macroscopic and microscopic anatomy to modern techniques, including cell and molecular biology. The journal is open to any research concerning anatomy, allowing for a rapid increase in the number of participants, readers and citations. It is important to exhibit the anatomical research currently being carried out in specific regions of the world to recognize its potential and the variety of topics investigated within this field, as well as to strengthen personal and scientific ties so that, in the future, a closer scientific anatomical collaboration could be carried out from a multidisciplinary point of view. Thus, the aim of this Special Issue is to demonstrate a sample of works conducted by anatomists in the Mediterranean region from all aspects of anatomical sciences, including anatomical formation. We hope for this Special Issue to open the door to increasing scientific collaborations between anatomical researchers in the Mediterranean region and to the future development of new successful lines of research in this region and abroad.
