Message from the Guest Editor

Dear Colleagues,

Reptiles breeding plays an important role for commercial purposes and for species conservation. Captive populations can be maintained when in the wild they become fragmented or when they are critically endangered. However, reptile breeding under artificial conditions can result in a variety of reproductive problems, requiring the involvement of expert veterinarians. As reptiles are also kept as companion animals, the role of exotic veterinarians is fundamental to assess animal welfare as well to safeguard public health.

In this Special Issue, we invite contributions that investigate reproductive strategies as well reproductive problems of reptiles, with particular attention to breeding management. The scope of this Special Issue includes every reptile species. Topics may include, but are not limited to: reproductive behaviors and diseases, sex identification/determination, breeding programs, assisted fertilization, sperm collection, etc.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
