Message from the Guest Editors

Dear Colleagues,

Health challenges such as antimicrobial resistance and emerging pathogens, draw attention to new aspects of the ecology of diseases in wildlife populations. In this context, the application of multidisciplinary studies is necessary and increasingly required, aiming to provide new information from a One Health perspective.

For this reason, we feel the need to create this space to give a voice to those working in the wildlife-related fields and who, through their commitment and work, have generated new useful data on infectious diseases (bacteriology, virology, parasitology) of wildlife and game meat safety. Given the growing interest on these topics to tackle the new challenges of our time, in this Special Issue, we welcome both original research papers and reviews focusing on wildlife infectious diseases, disease ecology at the wildlife–domestic animal/human interface and food safety issues related to game meat.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.
Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
