Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editors

Wind-turbine-related bat mortality is a major conservation concern as hundreds of thousands of bats are killed annually at wind farms worldwide. The issue is compounded by a lack of knowledge regarding 1) the population size and trends for many of the species impacted, 2) the behavior and physiological characteristics that attract bats to wind turbines, and 3) bat activity and movement patterns. Advances in population analyses, thermal video cameras, and machine learning, and radiotracking and GPS tags may help to improve our ability to assess and mitigate the potential population-level risk of land-based and offshore wind turbines on bats by improving the effectiveness of impact reduction strategies, such as smart curtailment and ultrasonic deterrents.

This Special Issue focuses on advancements in the methodologies used to assess bat populations, technologies used to study bat activity and behavior, and physiological characteristics that relate to how bats respond to various stimuli (e.g., audio, visual, electromagnetic) that may serve as either attractors or deterrents to wind turbines.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
