Advances in Hypersonic Flows

Guest Editor:

Dr. Jiaao Hao

Department of Aeronautical and Aviation Engineering, The Hong Kong Polytechnic University, Kowloon 999077, Hong Kong

Deadline for manuscript submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

Hypersonic flows typically refer to flows where the Mach number is greater than five. Characterized by high speeds and high temperatures, hypersonic flows involve various flow phenomena that remain to be fully understood. In this Special Issue, we invite submissions addressing, but not limited to, hypersonic transition, shock wave–boundary layer interactions, thermochemical nonequilibrium flows, hypersonic propulsion systems, and hypersonic rarefied flows.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
