Resources and Agrobiology of
Seville, Avda Reina Mercedes 10,
41012 Sevilla, Spain

Message from the Guest Editors

We are pleased to announce this Collection titled “Editorial Board Members’ Collection Series: Waste Management and Recycling”. Waste management starts with the 3R (reduce, reuse, recycle) sequence concept. Implementing appropriate waste management is a top priority in building a sustainable society. Sustainability is impossible without circular waste management practices. This Collection Series presents recent advances in the recovery and recycling of solid waste. New concepts to close the waste loop and application of materials have been proposed, but issues regarding low recovery efficiency, high recycling cost, and limited applicability should still be addressed.

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
