submissions:

20 July 2024

Message from the Guest Editors

The evaluation of electromagnetic fields generated by lightning discharges is extremely important in order to guarantee the reliability of electrical and electronic systems as well as the people safety. Modeling, analysis and numerical considerations represent crucial issues to be addressed in order to provide innovative solutions in the lightning protection field.

Researchers around the world are welcomed to provide their contribution in the field, focusing on innovative methods for the computation, analysis on particular frameworks where the protection should be enhanced and new models able to provide better insights in the lightning phenomenon.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
