

Artificial Intelligence in Life Quality Technologies

Guest Editors:

Prof. Dr. Piotr Prokopowicz

Institute of Computer Science,
Kazimierz Wielki University,
Bydgoszcz, Poland

**Prof. Dr. Katarzyna Węgrzyn-
Wolska**

Efrei Research Lab, Efrei Paris
Panthéon-Assas Université, 30-32
av. de la République, 94800
Villejuif, France

Dr. Maciej Piechowiak

Institute of Computer Science,
Kazimierz Wielki University,
Bydgoszcz, Poland

Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editors

The main purpose of this Special Issue is to gather original publications on the latest applied research on intelligent data analysis, predictions, optimization and classification, as well as the design of algorithms and procedures. We are particularly interested in topics related to applications concerning improving the quality of life and solutions for improving health. These include a wide range of applications of AI methods in the fields of medicine, agriculture, additive manufacturing, sustainability, and ergonomics.

The main AI methods covered by this Special Issue are as follows:

- Methods based on the fuzzy sets concept in its various forms;
- Solutions based on ANNs, especially deep neural network variants;
- AI methods inspired by Nature (e.g., evolution-based algorithms or swarm intelligence).

The above list is not exhaustive. Papers on other AI methods applied in life-quality-related technologies are also welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
