

AI-Driven Automotive Advances: From Passenger Monitoring to Autonomous Navigation

Guest Editors:

Prof. Dr. Jose M. Celaya-Padilla

Prof. Dr. Huizilopoztli Luna García

Dr. Hamurabi Gamboa-Rosales

Dr. Antonio Martínez Torteya

Deadline for manuscript
submissions:

20 August 2024

Message from the Guest Editors

The rapid rise of AI technologies has left an indelible mark on almost every industry, and the automotive domain is no exception. This Special Issue delves deep into the heart of AI-driven transformations that are redefining our vehicular experiences. Spanning the realms of real-time passenger monitoring to the futuristic aspirations of autonomous navigation, the range of topics illuminates the breadth and depth of AI's impact.

This Special Issue will be dedicated to AI-driven automotive advances; subjects that will be discussed in this Special Issue will focus not only on modern methods, technologies, and cutting-edge innovations in the automotive industry and their applications but also on new approaches for vehicle and human safety on the road.

Keywords

- smart/road safety
- passenger monitoring
- driver assistance
- next-gen heuristics for connected cars
- driver assistance systems
- autonomous driving technologies
- sensor fusion in passenger monitoring
- predictive analytics in driver assistance
- vehicle-to-everything communication
- advanced driver assistance systems
- AR and VR in driver assistance
- UX and experience in the automotive industry

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
