Message from the Guest Editors

Dear Colleagues,

Building on the success of the published Special Issue on “Climate Change, Carbon Capture, Storage and CO₂ Mineralisation Technologies”, we are pleased to announce the launch of the second Special issue on a broader range of subjects, titled “Climate Change, Carbon Sequestration and Energy Storage”, of which you are invited to be a part.

As our society progresses, both technologically and scientifically, we are becoming more aware of the interconnections within our ecosystems and what impacts our actions produce. Within this framework, we are welcoming current state-of-the-art research findings that provide innovative solutions to climate change, carbon sequestration, and energy storage, either in combination or individually.

Dr. Nikolaos Koukouzas

Dr. Pavlos Tyrologou

Dr. Petros Koutsovitis

Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
