

Evolutionary Computation: Theories, Techniques, and Applications

Guest Editor:

Prof. Dr. Vincent A. Ciciello

Computer Science, Stockton
University, Galloway, NJ 08205,
USA

Deadline for manuscript
submissions:

closed (30 January 2024)

Message from the Guest Editor

This Special Issue invites submissions on recent advances in the theory and applications of evolutionary computation. Papers on all forms of evolutionary computation are welcome, including but not limited to genetic algorithms, genetic programming, evolution strategies, evolutionary programming, and memetic algorithms, as well as papers at the intersection of evolutionary computation and machine learning, such as neuroevolution. Additionally, we welcome papers that employ closely related techniques such as simulated annealing, ant colony optimization, particle swarm optimization, artificial immune systems, and other metaheuristics. All application areas are welcome, but submissions that deal with problems in the applied sciences are especially encouraged.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
