Message from the Guest Editors

Dear Colleagues,

The Special Issue will collect research and studies on affordable solutions for cooling systems for buildings suitable to fulfill the demand for comfort arising from a huge number of new users, mainly living in hot and humid regions.

Topics for this Special Issue include but are not limited to the following:

- Solar cooling systems for residential applications in hot and humid climates;
- Heat-driven chillers of small/medium sizes;
- Evaporative cooling (technologies and potential application);
- PV driven air conditioners;
- Reversible heat pumps for hot and humid climates;
- Compact hot and cold storage devices;
- New and traditional materials for refrigeration cycles and heat storage;
- ICT applications for heating and cooling systems;
- Demand/response schemes and applications for residential users;
- Advanced controls for innovative HVAC systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
