## **Message from the Guest Editors**

The title of this special issue is 'Detection of Agrochemical Residues in Agriculture. The core focus of this special issue is on analytical methods for pesticides and organic compounds in agriculture, with an emphasis on mass spectrometry and residue testing. Not all manuscripts need to be composed of experimental results; we also welcome review articles and those using meta-analysis.

### **Message from the Editor-in-Chief**

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
