Deadline for manuscript submissions:

closed (20 January 2024)

Message from the Guest Editor

Dear Colleagues,

Pelvic fractures are the third most common cause of death in commutation accidents, after central nervous system and thoracic injuries. These kinds of fractures represent an increasing clinical challenge as a result of intensive transport developments.

Due to the complex nature of high-impact injuries, pelvic fracture patients remain are of interest not only to the orthopedist, but also to an interdisciplinary team of specialists. A better understanding of treatment options is mandatory in pelvic fractures. New treatment strategies will increase the quality and outcome of patient care.

This Special Issue will focus on the pathophysiology, biomechanics, and clinical outcome of pelvic fractures. We will also focus on novel insights into the diagnosis and treatment of pelvic trauma.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
