

Research on Biomedical Signal Processing

Guest Editors:

Dr. Maurizio Varanini

Institute of Clinical Physiology,
National Research Council of
Italy, via Moruzzi 1, 56124 Pisa,
Italy

Dr. Alessandro Tonacci

Clinical Physiology Institute,
National Research Council of
Italy (IFC-CNR), Via Moruzzi, 1,
56124 Pisa, Italy

Dr. Lucia Billeci

Clinical Physiology Institute,
National Research Council of
Italy (IFC-CNR), Via Moruzzi, 1,
56124 Pisa, Italy

Deadline for manuscript
submissions:

closed (20 February 2023)

Message from the Guest Editors

Today, new signal databases become available every year, with computing power and storage capacity that have reached incredible levels. We believe that the right conditions now exist to produce significant achievements in biomedical signal processing.

This Special Issue therefore aims to collect the most interesting novel biomedical signal processing methods and applications in the healthcare and clinical field, i.e., diagnostics, personalized medicine, patient monitoring, and disease prevention and prediction. In this Special Issue we welcome both original research papers and review articles on diverse topics such as:

- biomedical signal (ECG, EEG, etc.) processing
- statistical signal processing
- artificial intelligence
- machine learning
- non-linear systems
- pattern recognition
- wearable sensors
- patient monitoring
- automatic diagnosis
- risk assessment
- disease prevention and prediction

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
