**Dr. Anil Kumar**

Guildhall School of Business and Law, London Metropolitan University, London N7 8DB, UK

**Prof. Dr. Mohamed Mahjoub Dhiaf**

Faculty of Business, Emirates College of Technology, Abu Dhabi, UAE

Deadline for manuscript submissions:

**closed (10 February 2022)**

### Message from the Guest Editors

Dear Colleagues,

The current World's context has challenged supply chains, especially with regard the resilience and sustainability aspects. At the same time that pandemic and climate issues have been arisen in the world, the fourth industrial revolution (Industry 4.0) brings many opportunities for supply chains by the adoption of disruptive technologies. This includes data, information and knowledge technologies, which are integrated with physical technologies allowing to generate more efficient, integrated, transparent and smarter supply chain's processes. Moreover, discussions in how supply chains can act for a more sustainable and smart societies (Society 5.0) are also in the arena. Therefore, this special issue aims to answer a key question which is how the application of disruptive technologies can contribute for a more sustainable and resilient supply chains.

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
