### Message from the Guest Editors

Dear Colleagues,

Chemicals that come onto the market have been previously evaluated following the REACH regulation; however, in many cases, it is necessary to carry out studies to examine what effect these compounds can have on human health. For this, it is important that the studies conducted are toxicity, genotoxicity, or toxicokinetic studies, among others. In this Special Issue, papers focused on the toxicity of chemicals using different experimental evaluations and prediction methods will be welcome.

Dr. Laura Lomba Eraso

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
