Message from the Guest Editors

Greetings environmental science researchers. We encourage your contributions to the Special Issue of the scientific journal, *Applied Sciences*. The Special Issue will focus on the treatment of wastewater, stormwater, agricultural drainage, and/or hazardous substances through various treatment technologies and methods. Experimental and observational studies that document reductions in the concentration or mass load of contaminants in wastewater, stormwater, agricultural drainage, and other waste materials are being solicited. Short communications and full length, completed studies describing treatment processes and treatment technologies will be considered. We also encourage papers that document innovative techniques to detect and quantify pollutants in the environment, thus allowing the improved risk assessment and management of pollutants.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
