Breakthroughs in Real-Time Bioprocess Monitoring

Guest Editors:

Dr. Nídia Dana Lourenço

UCIBIO, Department of
Chemistry, Faculdade de
Ciências e Tecnologia,
Universidade Nova de Lisboa,
2829-516 Lisbon, Portugal

Dr. João Almeida Lopes

iMed.U.Lisboa, Faculty of
Pharmacy, University of Lisbon,
1649-004 Lisbon, Portugal

Deadline for manuscript
submissions:

31 January 2024

Message from the Guest Editors

Real-time bioprocess monitoring is essential for efficient bioprocess operation and effective bioprocess control. In contrast with offline, retrospective, and time-consuming reference analytical methods, which do not provide a real-time knowledge of process performance, the use of fast, non-destructive, robust, and sensitive online sensors have great potential for real-time monitoring of key bioprocess parameters, significantly reducing the time required for bioprocess control and optimization.

The Special Issue “Breakthroughs in Real-Time Bioprocess Monitoring” aims to highlight novel strategies to monitor bioprocesses using real-time sensors. Potential topics of this Special Issue include, but are not limited to:

- Wastewater treatment;
- Waste valorization;
- Pharmaceutical bioprocesses;
- Stem cell bioprocesses;
- UV-Vis spectroscopy;
- NIR spectroscopy;
- Raman spectroscopy;
- NMR spectroscopy;
- Fluorescence spectroscopy;
- Flow cytometry;
- Biosensors;
- Microfluidics and microanalysis;
- Optical sensors;
- Bioprocesses.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
