Deadline for manuscript submissions:

closed (20 August 2023)

Message from the Guest Editor

Dear Colleagues,

Currently, most developed countries are involved in a green transition in energy production. For that purpose, green hydrogen is considered the most interesting and promising vector. Since the main hydrogen production process has been, traditionally, steam reforming of natural gas or crude oil fractions, a deep transition to sustainable processes is needed. The *Applied Sciences* Special Issue “Advances in Sustainable Hydrogen Production: Challenges and Opportunities” will provide a unique opportunity to share the latest research and advances in sustainable hydrogen production developments, with a special focus on those based on the use of wastes as hydrogen sources.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
