

Recent Advances in Acquisition and Applications of Bacterial Cellulose

Guest Editors:

Dr. Lidia Stasiak-Róžańska

**Prof. Dr. Antoni Stanisław
Pluta**

Dr. Anna Berthold-Pluta

Dr. Monika Garbowska

Deadline for manuscript
submissions:
closed (31 December 2022)

Message from the Guest Editors

We are observing with concern the changing environment, the depletion of natural resources, and global warming caused by wrong human decisions. Fortunately, we still have the opportunity to have a real impact on environmental protection and sustainable development. Such a method can be, for example, the use of natural biopolymers such as bacterial cellulose in the broadly understood industry and medicine. In this Special Issue, we invite you to publish original and review papers on the latest applications of this biopolymer in various industries, e.g., as an alternative to non-degradable materials, a replacement for various materials, biodegradable packaging, or artificial tissue. Any manuscript describing the importance of bacterial cellulose for human beings, the environment, food, medicine, etc. will be very welcome.

Keywords

- bacterial cellulose
- microbial polymers
- biopolymers
- health-promoting polymers
- bacterial exopolysaccharides
- sustainable development
- food technology
- food package
- edible packaging
- edible films
- biodegradable
- nanocellulose
- biocellulose

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
