# Wine Chemistry

Guest Editor:

**Dr. Roxana Elena Ionete**
National Research and Development Institute for Cryogenics and Isotopic Technologies, Rm. Valcea, Romania

Deadline for manuscript submissions:
**20 July 2024**

## Message from the Guest Editor

Wine is a complex matrix that contains many classes of compounds such us sugars, alcohols, acids, flavonoids (tannins), non-flavonoids, minerals, and proteins, among others. Beyond the mastery of the winemaker and winemaking techniques, including aging conditions, wine is the expression of various factors related to the provenance area, type of grape variety, *terroir* (soil type and climate), and grape-ripening process. All these features give its uniqueness and value.

This Special Issue aims to provide an insight on wine chemistry, from grapes to wine, covering both winemaking technological aspects, and wine aging and storage. Submissions that explore the chemical profile and sensory properties of wines, particularly chemical markers for specific winemaking practices and assessment of wine traceability, are encouraged. Novel approaches in terms of not only oenological practices and analytical methodologies for identifying compounds of interest (e.g., polyphenols profile, organic acids, minerals, and trace and rare earth elements) as quality and authenticity indicators but also valorization of by-products and waste from vinification processes are also welcome.

Special Issue

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
