Résidus Industriels, Rouyn-  
Noranda, QC, Canada

**James McNeice**

Kingston Process Metallurgy  
(KPM), Kingston, ON, Canada

Deadline for manuscript  
submissions:

**12 December 2023**

### Message from the Guest Editors

With the growth of industries and advancement in technologies, the demand for metals has simultaneously accelerated. This has resulted in a greater demand for mining and metallurgical activities, which are often associated with the generation of emissions and consumption of energy. As the world cannot be sustained without the use of metals, mining activities and metallurgical processes cannot be stopped. Efforts have been made to monitor and minimize the emissions caused by these essential industries. This Special Issue aims to present a collection of some of the latest studies in this field.

## Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

**Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
