Deadline for manuscript  
submissions:

**closed (31 October 2022)**

### Message from the Guest Editors

Dear Colleagues,

The journal *Atmosphere* launches a new Special Issue on Urban Climate Mitigation Techniques and Technologies and, as the Special Issue Editors, we would like to invite you to contribute your research achievements in this field.

This Special Issue aims to invite high-quality studies, covering topics such as (a) the evaluation of the urban climate using numerical and/or experimental approaches, (b) the contribution of the urban heat island mitigation strategies on the improvement of the outdoor thermal environment, citizens' thermal comfort and buildings' energy performance, (c) the assessment of the effect of climate change challenges on the urban areas including extreme heatwaves and flash floods, and (d) the definition of performance indicators and decision support criteria for optimal urban design.

The selection of the papers for this Special Issue will be based both on their innovation and originality but also their scientific and applied findings, suggesting a valuable contribution in the scientific community.

## Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

**Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
