Smart Robotics for Automation

Collection Editor:

Dr. Felipe Martins
Sensors and Smart Systems Group, Institute of Engineering, Hanze University of Applied Sciences, 9747 AS Groningen, The Netherlands

Message from the Collection Editor

Topical Collection "Smart Robotics for Automation" is dedicated to publishing research papers, communications, and review articles proposing solutions to increase the efficiency of automation systems with the application of smart robotics.

Topics of interest are related to robotics automation. A non-exhaustive list is as follows:

- Process automation with intelligent robotics;
- Intelligent robotic applications for production systems;
- Robotics applied to precision agriculture;
- AI and machine learning systems applied to robotics;
- Robot control;
- Robot manipulation and picking;
- Mobile robot navigation, localization, and mapping;
- Interpretation of sensor data (including vision systems);
- Human–robot collaboration (including cobots);
- Multi-robot systems

This Topical Collection is focused more on automation. Papers focus on sensors may choose our joint Topical Collection in Sensors (ISSN 1424-8220, IF 3.275).

Editor-in-Chief

Prof. Dr. Eyad H. Abed
Department of Electrical and Computer Engineering and the Institute for Systems Research, University of Maryland, College Park, MD 20742, USA

Message from the Editor-in-Chief

Automation (ISSN 2673-4052) is a international peer-reviewed open access journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of automation and control system. Both experimental and theoretical papers are published, including all aspects of manufacturing systems, energy management systems, aerospace control systems, micro- and nano-systems, learning systems, intelligent control systems and so on. Automation organizes Special Issues devoted to specific automation and controlling areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.
Reliable Service: rigorous peer review and professional production.
