Deadline for manuscript  
submissions:

**31 January 2024**

### Message from the Guest Editor

Dear Colleagues,

This issue is a continuation of the previous successful Special Issue “Approximation Theory and Related Applications”. Thank you for all authors and reviewers. We are glad to announce this Special Issue to collect more works in various aspects of approximation theory.

In this Special Issue, we will cover the field of approximations in special function classes, fractional approximations, approximation operators, approximations of functions of infinitely many variables, numerical analysis, harmonic analysis, spline approximation, stochastic approximation, asymptotic analysis, and applications of approximation theory. Our goal is to gather articles reflecting new trends approximation theory and related topics.

Prof. Dr. Yuriy Kharkevych
