### Message from the Guest Editors

This Special Issue will accept high-quality articles containing original research results and survey articles of exceptional merit on new developments in the following topics:

Ordinary and Partial Differential Equations

Difference equations

Integral and integrodifferential equations

Boundary value problems

Fractional Calculus and Applications

Calculus on Time Scales and Applications

Existence, uniqueness and multiplicity results by variational and/or topological methods

Qualitative, asymptotic and oscillation properties.

Fixed point theory

Applications to real world phenomena.
