Technology, University of
Chemistry and Technology,
Technická 5, 166 28 Prague,
Czech Republic

Deadline for manuscript
submissions:

15 May 2024

Message from the Guest Editors

Considering the success of the previous Special Issue, we are pleased to announce that we are launching a second Special Issue on the topic "Featured Papers in Malting, Brewing and Beer Section—Volume II".

The Special Issue will continue to present a collection of feature papers on the recent developments in malting and brewing processes, considering the use of traditional and alternative raw materials, conventional and non-conventional technologies, microorganisms, innovative processes, and emerging technologies to control and improve the production of beer.

This Special Issue is seeking papers that feature original research, as well as review articles. The journal offers a high-quality peer-review and rapid publication process. We look forward to receiving your contributions.
