Message from the Guest Editors

With the rapid development of technology, computer-aided diagnosis (CAD) has made significant advances in recent years. This technology performs clinical diagnoses and provides treatment recommendations. To increase the effectiveness of treatments, reduce the risk of false diagnoses, select appropriate courses of treatment, and predict the outcomes of many clinical scenarios, modern health research must take on the challenge of acquiring, analyzing, and applying vast amounts of biomedical data (such as signal data, image data, etc.). This Special Issue is intended to serve as a platform for the publication of articles that address significant issues related to both theoretical and practical CAD in biomedical applications.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)
