### **Message from the Guest Editor**

Dear Colleagues,

The exposome can be defined as the measure of all exposures of an individual in a lifetime, and how these relate to health. Therefore, the topic of immune health and development, from an exposome perspective, is a focus of increasing interest.

This Special Issue aims to collect state-of-the-art primary research studies and review articles from international experts and leading groups on roles of the exposome in immune evolution and disease mechanisms.

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
