Genomic Insights into Algal Adaptation and Conservation

Guest Editors:

Dr. Zhenbing Zheng

CAS and Shandong Province Key
Laboratory of Experimental
Marine Biology, Institute of
Oceanology, Chinese Academy of
Sciences, Qingdao 266071, China

Dr. Jun Qian

Key Laboratory of Poyang Lake
Environment and Resource
Utilization, Ministry of Education,
School of Resources &
Environment, Nanchang
University, Nanchang, China

Deadline for manuscript
submissions:

28 February 2025

Message from the Guest Editors

With the increase in biotechnological, environmental, and nutraceutical importance of algae, over 100 whole genomic sequences of algae have been published. The adaption and conservation of algae hints at the range of functional capabilities encoded by their genomes. In order to explore the algal adaption and conservation and fully exploit their commercial/environmental potential, understanding their evolutionary, structural, functional, and developmental aspects at genomic level is a prerequisite. Algal genomics not only helps us to understand the adaptation/conservation of algae but also may have an impact on our future by helping to create algae-based products and future biotechnological approaches.

Therefore, we invite scientists to publish their latest research results in the genomic field of algal adaptation/conservation in scientific articles, and to share their insights on this topic in research articles. Scientific articles concerning the research on algal adaptation/conservation involving molecular traits, metabolic regulation, environment adaption, and genetic engineering are welcome.

Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
