Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editors

Dear Colleagues,

Current increasing evidence suggests that the placenta plays an important role in participating in the process of maternal adaptation in early stage. This is because preeclampsia and foetal growth restructure are collectively referred to as placental dysfunction or placental syndrome. Better understanding maternal adaptation between the physiological and pathological conditions in the first trimester pregnancy can pave the way for the development of strategies for early intervention and prevention if needed.

Purpose of the special issue:

To better understand the mechanisms underlying how maternal adaptation develops.

Focus:

This Special Issue will focus on (1) how the placenta contributes to maternal adaptation in physiological conditions, (2) how mothers respond to triggers from the placenta in physiological and pathological conditions.

Scope:

All topics, including but not limited to placentation, placental metabolism, placental development, placental pathology, the clinical aspect of maternal cardiovascular changes, and the assessment of biomarkers of placental disorders.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
