Message from the Guest Editors

Dear Colleagues,

Forensic casework inevitably leads to new food for thought. Forensic anthropologists have in the past years developed promising multidisciplinary approaches and research. In fact, casework, whether “new” or “cold”, as in cold cases, is associated with specific issues that often require new experimental research in order to find objective answers and solutions. The recent literature includes plenty of studies in which forensic anthropology mixes with advanced biomedical technology such as microscopic, histological, molecular, chemical, radiological, 3D imaging, and bioengineering applications, just to name a few.

With the intent to disseminate such a diversity of perspectives and knowledge, this issue aims to cover a variety of topics related to forensic anthropology and to its cross-disciplinary approach. Topics we are looking to cover include but are not limited to biological profile (sex, age, stature, population affinity, pathological status), personal identification, trauma analysis (ante-, peri- and post-mortem), taphonomy, time since death, commingled remains, and much more.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
