Message from the Guest Editors

Pain is the most prevalent symptom of all and also accounts for up to 80% of the causes of access to our healthcare facilities through the emergency department. From this perspective, the field of pain should be one of the greatest challenges for healthcare providers. Among the different types of pain, craniofacial pain and headaches have proven to be highly disabling and involve very high healthcare costs.

In recent decades, the approach to both pain assessment and treatment has undergone significant changes and advances. Key to these advances has been the development of new neurophysiological models that aim to explain how pain works and how it impacts from a biopsychosocial point of view.

Specifically, this Special Issue aims to bring together new research in the field of craniofacial pain and headaches. This Special Issue welcomes original articles and reviews focused on the pathophysiological (or physiological, or neurophysiological) mechanisms of Craniofacial Pain and Headaches.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
