Biosensors at the Aid of Medicine

Guest Editor:

Dr. Sharon Marx

Department of Physical Chemistry, Israel Institute for Biological Research, Ness Ziona, Israel

Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editor

Biosensors are sensors that link a biological compound an enzyme, receptor, DNA/RNA, antibody or even whole cells—to an electrical transducer and measure biochemical events. For the last few decades, there has been extensive research in the field of biosensor development. Research activities have spread from receptor design and immobilization strategies to enhanced and sensitive transduction technologies.

IMPACT FACTOR 4.7

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
