Message from the Guest Editor

Neurodevelopmental disabilities is a long-standing and overarching term covering a range of developmental challenges related to irregular brain function including, but not limited to, attention deficit hyperactivity disorder (ADHD); autism spectrum disorder (ASD); communication; speech or language disorders; dyslexia and dyscalculia; fetal alcohol spectrum disorders (FASDs); global developmental delay (GDD); intellectual disabilities (IDs); neonatal abstinence syndrome (NAS); and neurogenic disorders and traumatic brain injury (TBI) in infants, children, and youth. The complexity of growing and aging with a neurodevelopmental disability is now being recognized, along with a lack of societal support which induces aging. Some neurodevelopmental disabilities are recognized to be genetically related, and neurodevelopmental disabilities are diagnosed more frequently in males versus females.

New research knowledge about neurodevelopmental conditions will be presented in this Special Issue of *Biomedicines*.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
