Message from the Guest Editor

The purpose of this Special Issue is to address the attributes of a wide variety of interfacial phenomena on any biomedicines at any hierarchies, such as transdermal administration, intracellular drug delivery, implants and biomaterials, and protein–drug interactions. This Special Issue will serve as a broad overview for scientists from multidisciplinary fields working on biointerfaces. I invite both original research articles as well as review articles; in vitro, in vivo, and in silico studies are welcome.
