### **Message from the Guest Editor**

Our goal as nephrologists is to reduce the incidence and impact of kidney disease worldwide. To this end, it is of paramount importance that renal science and patient care are tailored to the unique and diverse needs of patients and clinicians worldwide. In order to better advance nephrology care, the underpinnings of the various pathophysiological processes leading to the wide array of nephropathies need to be better understood. A better mechanistic insight into the pathophysiological pathways underlying the various nephropathies encountered in clinical practice will allow the development of innovative treatments in the future and advance nephrology care.

This Special Issue will focus on basic and clinical research in aspects pertaining to pathophysiology and treatment of kidney disease.

Both original research articles and reviews on the science and practice of nephrology from the global nephrology community are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
