Deadline for manuscript submissions:

closed (30 June 2023)

Message from the Guest Editor

Dear Colleagues,

Chronic kidney disease is a public health issue of growing importance worldwide because of its impact on both individual morbidity and mortality and its economic burden for healthcare systems. In recent years, our understanding of its pathogenesis has developed, in terms of deciphering its molecular and cellular pathways of progression.

Consequently, breakthrough research on new diagnosis biomarkers means that the early recognition of this condition is being promoted. From the "omics" approach which have shed insights into some of these aspects to biomarkers which are readily available in the daily medical practice and the contribution of artificial intelligence, the field is almost endless.

In this Special Issue, we will collate the most essential knowledge from various research centers, focused on the theoretical background or experimental and clinical studies of the pathogenesis, diagnosis and treatment of chronic kidney disease. This can provide a useful tool for medical practitioners, medical students and future researchers in this scientific field.

Dr. Cristina Capusa

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
