Message from the Guest Editors

Dear Colleagues,

Current technological advancements in mass spectrometry and separation instrumentation had allowed proteome characterization at an unprecedented depth deciphering the molecular phenotype of various pathologies. Among them, cancer still constitutes a significant therapeutic challenge, particularly for late-stage diagnosed clinical cases or uncommon cancer forms, for which proteome characterization and biomarker identification continue to get a lot of attention. Quantitative proteomics established itself as a key-method in explaining molecular changes during malignant transformation, as recently proved by various consortia aiming to bring proteomics technologies closer to the clinics.

The current special issue concentrates on the application of proteomics-derived technologies. Systems-level characterization of various post translational modifications with an emphasize on tumor biology are also welcomed.

We are interested in both, original manuscripts, and reviews for this special issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
